StarPVCU®
WINDOW SCREW CODES EXPLAINED

rapierstar®

StarPVCU. window screw codes follow a simple formula - Head, Thread, Point.
For example:-**C**ountersunk, **S**paced self-tapping thread, **R**einforcement = CSR.
This prefix is then followed by the size & finish specification to make up the full code e.g. CSR 3.9 x 25 Z.
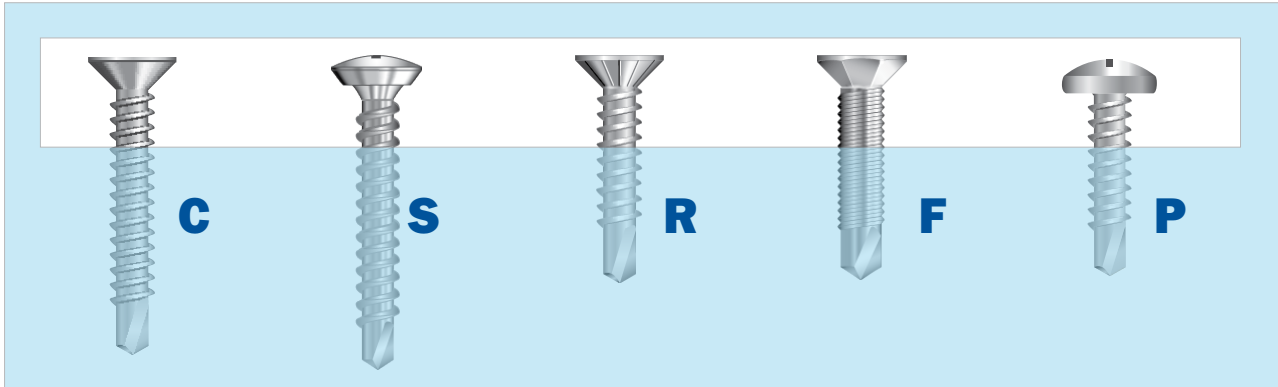

HEAD STYLES

Countersunk
for hardware
fastening

Shallow Pan
for friction stay
fastening

Ribbed -
Self-sinking for
reinforcement
retention

Faceted -
Self-sinking for
reinforcement
retention

Pan - for
reinforcement
retention and
hardware fastening

C   S   R   F   P
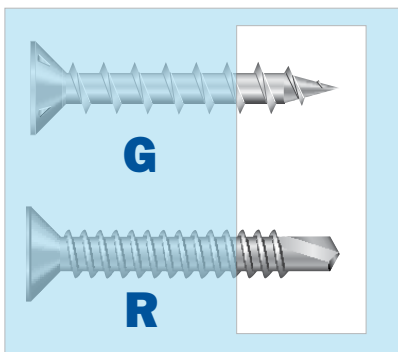

THREAD TYPES

M   S   F

Metric
self-tapping
for reinforcement

Spaced
self-tapping
for reinforcement

Single deep
Fast thread
for PVCU

POINT STYLES

G

Gimlet
for fastening
hardware to PVCU

R

Drill
for fastening
hardware to
Reinforced profile
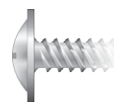

SPECIAL HEAD STYLES

Mechanical jointing

Nipple - for weatherbar
fastening

Bugle - for cill fastening

Wafer - many applications
including baypole assembly
and installation
